DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 14- 43 are rejected under 35 U.S.C. 102(a) as being anticipated by Masoud et al (J. of Bacteriology Dec. 1995 pp. 6718-6726).

Masoud et al teach the isolation of lipopolysaccharide core of P. aeruginosa (see whole doc.) . They teach that the core contains an alanine (see Table 2 & Figure 8 & 9). Figure 9 appears to teach the lipid core structure.

The term “bioactive agent” and “covalent conjugate” are interpreted broadly to include the polysaccharide portions of the lipopolysaccharide.

The response filed 10/3/03 strictly bases its argument that Masoud et al do not teach bioactive agent or non toxic lipid. Masoud et al also teach portions of lipid core that are covalently bound to polysaccharide and vaccine derivatives of core glycolipid antigen (see Table 2). Moreover, the response merely states that Masoud et al do not teach non toxic lipid portions. As these structures are within vaccine preparations, they are therefore do not exhibit toxicity. Moreover, the response states that further limitations in claim 35 & 36 are drawn to further limitations including a molecule affecting metabolism of a cell or antimicrobial molecule. As

Masoud preparations are for vaccines, the molecules would induce a response in metabolism by antibody production for vaccine effectiveness against the microbe *Pseudomonas aeruginosa*.

They also state that the LPS is most immunoreactive surface antigen (see page 6718). Moreover claims 14 & 26 do not recite limitations of claim 35 & 36.

THE FOLLOWING IS A NEW GROUND OF REJECTION NECESSITATED BY THE AMENDMENT

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 35-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amended claims recite therapeutic molecule. The range of different diseases and possible molecules that may offer therapeutic effect is very broad. However, the specification does not provide sufficient support for the breadth of the claims. While not every possible species must be disclosed, a requirement that a sufficient number of species that one of skill in the art would recognize that applicant was in possession of the necessary common attributes or features of the elements possessed by members of the broad genus must be satisfied. In the specification the mere listing of possible therapeutic effects does not provide adequate support.

SUMMARY

3. No claims allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Siew whose telephone number before January 22, 2003 is (703) 305-3886 and thereafter can be reached at 571-272-0787. The e-mail address is Jeffrey.Siew@uspto.gov. However, the office cannot guarantee security through the e-mail system nor should official papers be transmitted through this route. The examiner is on flex-time

schedule and can best be reached on weekdays from 6:30 a.m. to 3 p.m. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Gary Benzion, can be reached on (703)-308-1119.

Any inquiry of a general nature, matching or filed papers or relating to the status of this application or proceeding should be directed to the Tracey Johnson for Art Unit 1637 whose telephone number is (703)-305-2982.

Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Center numbers for Group 1600 are Voice (703) 308-3290 and FAX (703)-308-4242.
